new logo is integrated.

Have a "see a few of our members' projects, linking to the awesomeness directory or logos that link to projects directly, e.g. the Virtual Worlds museum etc
Great work! Continue the work before vote / make live

fun finds etc
new Apple headset VisionPro - nothing wow, but the best currently on the market. Compares to Hololens - SoloSolipsist. Flow between different devices is good.

[@aaronfranke](#) shared their usage of various OMI protocols and gITF extensions. Announced here on [twitter](#).

aaron qITF audio asset update: not just audio, also an asset integrating the physics. High quality.

Also, looking at the code, there is now a single-root plugin that makes things easier for integrations across game engines.

Blog

How should we approach the blogging?

We have these ideas for topics:

We think in this order:

- new chairs
- new logo
- new discord
- first newsletter update combining those three
- Future
 - new protocols/tests
 - highlight members and their projects

We can publish through these channels:

- W3C Mailing List and Page
- Our Own Website
- Twitter
- Is there another?
