Reminder for newcomers: working group times are established by the participants. We have contributors all around the world. If you can't make a time work, you suggest a new time to the working group. No centralized leadership sets times and we are aware that we are not solely consistent of North American contributors.

But if you decide on a new time, you need to attend. Setting working group meeting times is difficult enough to accommodate everyone. If we have enough participation it's possible there may be multiple meetings for multiple working groups but that is a good problem to have and one that can be addressed when there are enough participants.

**@mrmetaverse** I was thinking we could start each meeting with a script to consistently orient the goal of the meeting for everyone attending (new and existing members.)

#### Intro

"The Open Metaverse Interoperability Group (OMI) is focused on bridging virtual worlds by designing and promoting protocols for identity, social graphs, inventory, and more. Our members include businesses and individuals working towards this common goal. Aside from technical work, OMI aims to create a community of artists, creators, developers, and other innovators to discuss and explore concepts surrounding the design and development of virtual worlds.

If you're an observer or here for the first time, this is a meeting where people who work on the OMI group initiatives discuss updates and contribution opportunities for current projects and goals. This is your chance to jump in and help!

We welcome you to introduce yourself in #omi-meeting-chat as we dive into the agenda items. There will be an open floor in the last 15 minutes of the meeting (agenda permitting) where we can discuss any items you feel are relevant to the current or near future OMI goals.

Before we get started would anyone like to volunteer to take notes?"

If someone volunteers they can take notes in the comment section {

"Please feel free to ask if we should note something if it is not clear what should be logged. The note taker is granted the ability to stop any conversation to back up and agree on consensus or action items."

If no volunteer { Meeting facilitator takes notes.
