OMI Champ meeting - November 4, 2022

- New time for Champions meetings?
- Evo recapped some of the key items from Wednesday
 - Morpheus and Sindhu will take a stab at policy writing, and would like to take a look at our formation workshops and ideation workshops. (Vision, core values, etc.)
 - Clarity around how we manage our relationships and collaborate with others.
 - Champions will need to clarify is this a form on our website or discord? How can orgs/events request us?
 - need help defining how OMI can be mentioned in the media.
 - This needs to be on our website and git and needs to be easy to find
 - how to use our logo, how to refer to OMI, etc.
 - What about an FAQ section?
 - where can I get speakers from OMI?
 - How can I add new events to the calendar?
 - How can I suggest a new protocol?
- Milestones
 - Backlogs can get overwhelming for some, especially those who don't ever use tools like github or trello.
 - I encourage you to use [Milestones](#) instead.
 - What do you hope to achieve?
 - i.e. "Launch our new Blog" or "OMI Media Reference Documentation"
 - Now that you have defined the ideal *Outcome* what do we need to accomplish or answer to achieve that outcome?
 - i.e. "Logo usage Guide", "Style Guide," "Request Form", "Announcement"
- We need a form that comes to the champions to review new opportunities for participation.
 - Go to OMI site, fill out a contact form.
 - Champions can review the list
 - some level of filter (but not a crazy high bar) to weed out of scope events out.
 - A champion can choose to "own" the opportunity, creating an issue on behalf of the form-submitter to review in a Wednesday call or omi-votes channel.
 - If we can't find a champ to back the idea, it may not be in scope, but this is something we should discuss more.

- like what if its not a champion and its community members that are rallying around an event. We don't exactly need champs to become bottlenecks of opportunity. It's about ensuring people know how to submit and there is a process for reviewing.
- RE: Warroom or meeting space like Jin has been referencing
 - Anyone can choose to host a talk or meeting in a 3d space.
 - ideally we would have hybrid calls, with the *option* to attend in a 3d space.
 - Evo proposed a directory of all of our virtual properties. So folks can just jump in and out of virtual spaces on a whim.
- OMI published our first draft spec for OMI_Link gLTF extension. You can add a URI on a gLTF on a specific object. Allows some platforms using this functionality to start making interoperable content.
 - How can we encourage others to bring their solutions and proto-protocols?
 - OMI_Link is a perfect example of a draft protocol that emerged from the needs and collaborative requirements of multiple platform owners participating inside of OMI. This is what its all about imo (Jesse).
 - Bring your solutions and problems worth solving, and we can work together or point you in the right direction for making it into a draft protocol for collaborative review.

Web Form:

If you want to request OMI representatives to participate in your event or speak, you can go to our website and submit a Contact request Page. Some people are not familiar with github and using issues to submit these requests.
