

# 2025-01-01 Weekly Meeting 192 #508

indiebio started this conversation in **Weekly Meetings**

indiebio last week Maintainer

Weekly Meeting 192 is happening on Wednesday, 1 January 2025 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

Hope everyone has a great new year!

You can add it to your calendar [here](#).

We'll be meeting in the omi-weekly-meeting channel of the [OMI Discord](#).

We regularly use the # omi-meeting-chat channel for text chat.

## Agenda

check in, shootin' the breeze (add agenda points or notes as comments). Informal format because many parts celebrate New Year today.

Specific talking point: OMI 2024 report and plans for 2025

I would like to have a blogpost about what we achieved in 2024 (rather late than never) and what our goals are for 2025. Please add your comments.

Highlights: (please add yours)

- interesting conversations on Discord
- Interesting conversations documented on GitHub conversations
  - Compiling standards in nano-components [Standards components as nanopublications - worth](#)

[pursuing? #504](#)

Working groups: (please give a summary sentence and relevant links)

- MSF: jin's AI summary work
- glTF: specs approved, PR's merged, tensions navigated - lead by aaron, work by aaron, Yank Scally, add other names.
- media: growth of followers on social media channels. List them, list number of followers? List conversations had
- Virtual Worlds Museum - progress, award, mature to own Discord server
- Composable metaverse - conversation on Spaces, active dialogue on Discord channel
- highlights from omi-experiments

OMI members: (please add whatever you did that you are proud of)

- Solo launched Memotar
- Academic project proposal submitted - indiebio and knev
- iFire did stuff
- Sean RP1 progress
- 

Goals for 2025: (please suggest more)

- continue to improve our brand strategy, with the aim to attract contributing members. Focus on authentic, organic growth, quality over quantity. (lead by media group)
- continue to improve our reputation, to be a trusted source of specs, information and a diverse, healthy network of knowledge and people. (lead by media, glTF groups)
- develop a cross-platform conversational strategy (moving away from Spaces, looking into Youtube + Twitch, for example) (lead by media group)
- explore new ways to support <https://github.com/omigroup/omigroup/discussions/508> through nano-components (lead by glTF group)
- explore the social interoperability - how to work with different viewpoints, support plurality while maintaining accountability. (general, technically supported by MSF group)
- better integration with our w3c group. (lead by media group)
- technical experiment of portaling / interoperability through different virtual worlds (and wider) by hosting instances on different virtual worlds, along with a "kit" scene glTF file. Start with Hubs. (link to conversation)

jin: <https://x.com/ai16zdao/status/1874223078403682672>

- ElizaOS: 7700+ stars, 2100+ forks, 223 contributors, 1.2k followers
  - Merged 850 PRs—Eliza is now the most multichain AI agent framework ever
- Launched AI Dev School: <http://eliza.gg/school>
- 87 submissions made with ElizaOS for the Solana AI hackathon powered by [@sendaifun](#)
- Hundreds of teams are building on ElizaOS
- Eliza Labs x Stanford Future Digital Currency Initiative
- ai16z: First Solana AI memecoin to touch \$2B market cap
- AI mindshare is over 50% of all crypto narratives
  - Solana had 50% of crypto users last month
- ai16z AUM now exceeds \$30M, achieving 376x growth in 9 weeks
- Community growth:
  - 120k+ followers across [@ai16zdao](#), [@pmairca](#), and [@degenspartanai](#) X accounts
  - 62k+ holders for ai16z, ~14k for degenai

## 2025 Outlook

- Eliza V2 Development: Improved architecture, scalability, and plugin management
- Developer Experience: Tailored AI agents, agentic GitHub workflows, and code assistants for faster onboarding
- Autonomous Investors: Launch V2 of autonomous investor agents (like degenai)
- Tokenomics:
  - Launch Eliza agent platform + dev/partnership programs

- Launch RGPF program to strengthen open-source feedback loops
- Expanding Impact:
  - Pill web2 audiences on ElizaOS and DeFi
  - Build stronger developer pipelines and partnerships to accelerate adoption
