- Notice the discord events are manually generated
 - jin has been using [ChronicleBot](#) for couple months in M3 now
 - Vouches for its utility / effectiveness
 - Redundant with Apollo bot though?
 - Apollo bot doesn't generate Discord events
- Is it worth the switch to a bot that generates native Discord events?

How Apollo bot looks like rn

October 5, 2022

Apollo

Can't add to an announcements channel, need permissions

You cannot modify this permission because none of your roles have it.

Manage Messages

Allows members to delete messages by other members or pin any message in this channel. They can also publish messages by other members to all servers that follow this [Announcement Channel](#).

@mrmetaverse #omi-calendar-link channel is just a link to the Gcal, can that be in the header of announcements where events get posted instead and clean up 1 less channel?

- Credit card concerns
 - starting opencollective created many hours of additional responsibility
 - ifire suggestion to pay bills in bulk (6-12 months at a time)
- Working on graphql github discussions stuff to improve organizational memory
