Let's Share Links to Existing Standards and Specifications #12

TrevorFSmith started this conversation in **General**

TrevorFSmith on Apr 17, 2021

From the kickoff meetings and chats it seems like we ~all agree that we should use existing standards and specs when possible.

Let's use this discussion thread as a reference library of the metaverse-related standards and specs.

We won't use every single standard and spec listed here because we are doing something new. But, if we don't use a standard or spec then we should clearly know what the old work provided and why we don't want it. See [Chesterton's fence](#).

Hey, [@dmitrizagidulin](#). [@robertlong](#) suggested that you might be a person with a good set of links to specifications and standards for distributed identity. Would you be willing to add them here so that the OMI effort has good referenes?

Argh, how did I miss the notification for this :)

@robertlong that is a fantastic starting list! I will add to this shortly.
