In previous meetings, we worked on OMI_environment_sky [#244](#)

Including these changes:

- Support multiple skies instead of just one.
- Add plain color sky.
- Rename `procedural` to `gradient`.
- Rename `ambientColor` to `ambientLightColor`.

Today, we worked on OMI_environment_sky some more and made these changes:

- Remove redundant sky index property.
- Add glTF Object Model JSON pointers for KHR_animation_pointer, KHR_interactivity, etc.

We will be voting next week on merging OMI_environment_sky into the repo.
