Rename from KHR_audio to KHR_audio_emitter and add example file.

Discussed and merged with 1 approval: [omigroup/glTF#3](#)

This updates our fork of Khronos glTF with identical content to what's in the OMI glTF-extensions repo.

OMI_physics_body: Add explicit compound triggers instead of implicit ones.

Discussed and merged with 3 approvals: [#206](#)

This resolves one of the differences between OMI physics extension (OMI_physics_body) and Eoin/Microsoft's physics extension (KHR_physics_rigid_bodies) by implementing compound triggers.
