

2024-01-31 Weekly Meeting 144 Notes/Agenda #440

indiebio started this conversation in **Weekly Meetings**

indiebio on Jan 31 Maintainer

Weekly Meeting 144 is happening on Wednesday, 31 January, 2024 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting again in the omi-weekly-meeting channel of the [AngelIXR/OMI Discord](#).

We regularly use the # omi-meeting-chat channel for text chat.

Agenda

1. Can we vote on the new server?
2. Discuss the "about us" (previously called "mission") - <https://hackmd.io/@indiebio/OMI-mission>
3. working group check ins
4. demos and discussion

Admin:

backlog party: we looked at the existing, and discussed our next backlog refinement session for 2.6.24. We want the updated tix in before then.

New discord is created, but lets make sure we want this to be the path forward before announcing.

get indiebio have edit access/ listed as chair on W3C - need to update

Recent Topics

What are our focus groups? These are organically formed, based on interest from our members.

They need their own meetings, and whatever they need (e.g. not all need github repos)

e..g:

glTF - discord channel, github

virtual worlds - jin

standards - MSF group

integration - Kim and Roderick's stuff

mapping open metaverse components - wiki - meticolac (hoping to partner with OMF)

physical world links - indiebio

community, publicity team being a trumpet for our members

the people side - online participation, identity, user experiences

admin - backlog tasks, finances

2 About us .

Add what we DO do.

- weekly meetings, facilitating conversations on github, facilitating larger events and meetup
"community of like-minded individuals"
hyperlink the awesomeness directory, other links where appropriate - to keep the short length but allow branch out to more stuff.
Try to do each paragraph by what we DO stand for, and then what we don't.
add emphasis on metaverse standard recommendation making.
Add as an "About us" on the top right, as well as a "read more" on the About us section (on the main scroll down)

How do we get everyone to feel welcome?

What are our focus groups? These are organically formed, based on interest from our members. They need their own meetings, and whatever they need (e.g. not all need github repos)
e..g:

gITF - discord channel, github

virtual worlds - jin

standards - MSF group

integration - Kim and Roderick's stuff

mapping open metaverse components - wiki - meticulous (hoping to partner with OMF)

physical world links - indiebio

community, publicity team being a trumpet for our members

the people side - online participation, identity, user experiences

admin - backlog tasks, finances

Decide on a day, time, format, structure ... for the X spaces, and then, if we do it, roundtable discussion, more open-ended, then ... it could get a network effect, and then ... what do we do with that generated momentum?? The Wednesday meetings is not appropriate, it's admin heavy content. We want to fill workgroup participation slots. So target and find people interested in the focus groups - fill glTF, fill MSF, fill W3C, join us at this virtual world at this date... etc etc.

So, yes, we need spaces but we need 1) a place to send people for general conversation (new Discord server!!) and 2) something to do - workshops etc, which needs people to organise them.

indiebio on Jan 31 Maintainer Author

Working groups:

glTF meeting discussed audio and physics - for details check out the meeting recording, and the channel and come to meetings!

wiki space / discourse space? <https://hackmd.io/@indiebio/Wiki-related-resources>

Discourse may be better for threaded conversations, e.g. have a topic "Godot in the metaverse"

indiebio on Jan 31 Maintainer Author

Publicity related:

Tons of thoughts on the Metaverse benefiting the real world already announced in the news or published on the web. Making a list of these thoughts and adding it to the OMI page may attract more folks. - gary also e.g. <https://x.com/RtoVR/status/1750636543163703311?s=20> about extended reality.

Demo / group updates:

"what can you put into a space that adds value to people?" - SoloSolipsist

e.g. an avatar that represents the chatbot, or a tour guide. Can help people get used to the technology better.

"What kind of traction is the Mirror (company / product) seeing?" Need to add more stuff. What are the use cases? What do people who do use it, want to do with it?

Poll (NOT A VOTE) about moving OMI to its own discord server (independent of AngellXR)

(Option 1 doesn't count, there was a comma :P)
