Weekly Meeting 42 is happening on Wednesday Feb 9nd, 2022 from 9:00 AM PDT - 10:00 AM PDT (17:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting again in the omi-weekly-meeting channel of the [AngelIXR/OMI Discord](#).

Who we are and why we're here:

The Open Metaverse Interoperability Group (OMI) is focused on bridging virtual worlds by designing and promoting protocols for identity, social graphs, inventory, and more. Our members include businesses and individuals working towards this common goal.

If you're an observer or here for the first time, this is a meeting where people who work on the OMI group initiatives discuss updates and contribution opportunities for current projects and goals. This is your chance to jump in and help!

We welcome you to introduce yourself in #omi-meeting-chat as we dive into the agenda items. There will be an open floor in the last 15 minutes of the meeting (agenda permitting) where we can discuss any items you feel are relevant to the current or near future OMI goals.

Working groups

We operate in working groups, to divide work based on themes of interest and availability. If the Metaverse is for anyone, we believe that anyone can add value to the Metaverse. Our working groups have their own working agreements, with meeting times decided by those who attend the working groups. Backlogs, discussions, and agile ceremonies are decided on at the group level, as we have contributors from all around the World. The best way to get involved is to reach out to the working group directly. Our existing working groups are on various levels of maturity. Some have been working for months and have working agreements in place, and take detailed notes each week. Others meet more ad-hoc or are brand new, and may not have formalities documented yet. You are encouraged to get involved with any group that fits your knowledge, skills, abilities, and interests, and help shape the culture of that working group collectively.

As new working groups form/storm they should create a simple readme with "who we are, why we exist, how you can get involved". That [should be a minimum requirement](#) so we can link to that readme from the main om i group/om i group working groups list. Everything else is determined at the working group level (ceremonies, working agreement, backlog process, etc.)
