Weekly Meeting 155 is happening on Wednesday, 17 April, 2024 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting in the NEW SERVER, in the omi-weekly-meeting channel of the [OMI Discord](#).
We regularly use the # omi-meeting-chat channel for text chat.

Agenda

It's our 3rd anniversary!

Check in, welcome

Fun finds!

Working groups check in

Mee6 bot update done! W3C page access granted! (content update pending) good backlog squashing, whoohoo!

Admin: We need to remove the thing that takes the events to Angell - looks like it currently goes to both servers.

drafts: [member interview questions](#) - nice question from humbletim; Interview from the future! (maybe 20 years into the future). Taking account of what happens, after what happens next:

"What's the single most profound impact the metaverse, or the pursuit of it, has had on your life?"

Lightning talk sign-up form draft: <https://forms.gle/ghQcSbpnoEGHPzGj9>

Comments?

(carry over: future of text blog draft and email to Linux Foundation...)

Last week's notes: [#460](#)

Lightning talk comments:

Can we have like a hackathon to let people practice through their interview questions? Sort of like the speaker coaching that we did for TEDx talks - great idea. Good for community building, and good for personal development of the speakers.

Do an end to end kind of sweep to find out the resources on how to do this - by practising with locals first. so added benefit is to streamline the resources required.

glTF gravity plugin has been going well. - aaron shows a demo

Publicity team doing well - working on transcribing interviews tool.

MSF team doing well - avatars group and wearables group working to align objectives. jin making a supercut video. Going forward seeks

meticulac: <https://www.metaverselibraries.org/>

Looking up metaverse libraries real quick, I guess <https://www.metaverselibraries.org/> would be interested in knowing about any effort like that.

jin: <https://madjin.github.io/janus-guide/#/examples/components?id=janus-custom-components>

janus had cool ways to visualize librarys

WebVR UI/UX components for Internet Archive

search result populated the crate of vinyls you see paginated 25 at a time

draw out disc and play on phonograph to play

or cassette, etc

never ending bookshelf

Meticulac —

I just know I tried looking up something like that before and found the Community Virtual Library, which is linked to from metaverse libraries dot org but seems to be more specific to Second Life.
