Fun finds:

TechnoWizard Anarchist: [Meta opening up their OS](#), ThrillSeeker did a great breakdown:
https://youtu.be/Ck0P8HfR_OE?si=6DbxDKeojRMmOmJx
jin: [Open Metaverse Research Group](#) - interesting community that mentions OMI in their wiki

Ongoing conversations

- Lightning talks - to plan next: a hackathon to let people practice through their interview questions, and an end to end kind of sweep to find out the resources on how to do this - by practising with locals first - streamline the resources required. (Also good for thinktank conversations)
- Collaborative Library Project - potential to link up with Virtual Worlds Museum?
- "if a blogpost was a 3D object, what would it look like?" - hackathon potential!
- Linux Foundation collaboration / OMF revival - send email (hopefully before this meeting)

Meta opening up their OS: member sentiments:

- Love that the Meta OS is opening up. "The Android of mixed reality"
- I think by stating their commitment to Open Standards, they are taking a leadership position with their hardware.
- interoperable asset inventories much needed.

can we gamify/incentivize turning these into more checks? maybe use some of our funds to issue bounties?
