How Webaverse does animation interop:

the sword defines the animations to use:

<https://github.com/webaverse/sword/blob/f6777403e2f883f985234ff5a8d1dd28a06f2e01/.metaversefile#L16>

the animation blend comes from the avatar system

and webaverse retargets it onto the VRM
