Weekly Meeting 241 is happening on Tuesday, 9 December 2025 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting in the omi-weekly-meeting channel of the [OMI Discord](#).

We regularly use the # omi-meeting-chat channel for text chat.

Agenda

check in, shootin' the breeze (add agenda points or notes as comments).

Demo's

working group updates: glTF, meta-org (incl Khronos, MSF...), media/curators, Virtual Worlds Museum™ and The Teleportal, composable metaverse, forum/experiments,
add fun finds in the comments

Specific matters to discuss

OSCC was really nice, the chat and different ways to discuss was really nice. A really good community, and the way the conference was structured was also inspiring.

glTF last week meeting, good ongoing conversations going.
Should we engage with IEEE, or IETF? <https://www.ietf.org/about/introduction/>
The Internet Engineering Task Force (IETF),
IETF is part of United Nations --- (could this link with the biosphere thing??)
Alliance for open USD - they have inroads to join without fees.

If we find content creators using USD, get street level use cases.
e.g. in ML simulation space.

**indiebio** [2 days ago](#)

Author

seanRP1: the challenge with USD is that it is designed for pixar level detail, huge files. USD is heavy.
So two groups - one for e.g. streaming the metaverse, and the heavy details.

glTF is broader use case.

zodie: different rethoric: glTF is about the TRANSPORT, and USD tries to be the description, tries to be all of it.
if USD can add the mess layer something - zodie

RP1 launch went very well, more than 200 people attended, someone built their own thing at the launch, so easy, so awesome.

Keyframe:

Here's the quick video I made for Open Simulator, we added over 127 OpenSim Hypergrids to the Teleportal!

<https://youtu.be/n4fnn9xprsE?si=kzDjGJ2dRsXwF6PX>

I can't make today's meeting cuz I'm over at the Google building showcasing an MR experience.

Pablo update: CTO change for Numinia.

Attended some events, e.g. Madrid Merge - blockchain focused

Mederia (?) open source community, based in Argentina, held in Madrid

Active Inference Institute digital event - did a demo.

Substrata Hyperfy still building, but open to other engines. - open needs to be mean licencing!

We're testing the market to see product-market fit. Starting to build the idea of a 3D website, will have a demo in a few weeks. Based currently on Hyperfy, which is based on three.js
