Weekly Meeting 88 is happening on Wednesday, December 28, 2022 from 9:00 AM PST(17:00 UTC) - 10:00 AM PST (18:00 UTC)

You can add it to your calendar [here](#).

We'll be meeting again in the omi-weekly-meeting channel of the [AngellXR/OMI Discord](#).

We regularly use the #omi-meeting-chat channel for text chat.

Who we are and why we're here:

The Open Metaverse Interoperability Group (OMI) is focused on bridging virtual worlds by designing and promoting protocols for identity, social graphs, inventory, and more. Our members include businesses and individuals working towards this common goal.

If you're an observer or here for the first time, this is a meeting where people who work on the OMI group initiatives discuss updates and contribution opportunities for current projects and goals. This is your chance to jump in and help!

We welcome you to introduce yourself in #omi-meeting-chat as we dive into the agenda items. There will be an open floor in the last 15 minutes of the meeting (agenda permitting) where we can discuss any items you feel are relevant to the current or near future OMI goals.

Agenda

- Volunteer to take notes? Volunteer to record?
- Welcome newcomers

Working Group Updates:

- [MSF delegates](#) (setting up the repo)
- [UX Research](#)
- [Scripting group](#)
 - OMI developer hour*
- [glTF Extensions Group](#)
 - Progress on OMI_ref and authoring extensions

- [Media Group](#)
- [M3 avatar interop](#)
- [OMI Website update](#)
- any others?

Discussions:

- OMC
- This is a time to build. What can we build?
 - Adding OMI to the Metaverse Street Jin demoed
 - M3 recently started a shop for wearables. This is a great example of things we could be doing and participating in.
 - Let's build right now.

Next week:

Future demo themes:

- [OMI-audio-emitter](#) exploration and demo
- [OMI-collider](#) exploration and demo (December 7!)
- [IPSME](#) and Me
- [Generative and AI tooling](#)
- Any other suggestions?

Demo III: Snowglobe in Croquet!

Using microverse and Croquet makes everything client side, no server code involved, multiplayer, and virtually no restrictions.

gltf extensions group

- Had a discussion last week. Major update: Convex hulls stored as a mesh.
- Liam and Ethereal engine are looking to collab on the same extension.
- 🤝 that's what it's all about! sharing learnings and exploring options together.

reaching out to Microsoft to converge on a common approach.

Very easy to implement, very flexible.

OMC:

3 major updates from last week:

- We can host watch parties. If you have a virtual world and want to host a OMC watch party, reach out!
- We get various ticket discounts: advanced early bird, etc.
- We get a booth at the physical conference in L.A.
 - three use cases
 - We can use the booth as OMI and talk about OMI and have a montage of all of the projects in our community, et al
 - If we were well-managed about it we could do multiple companies and demos (like 3 sections per day)
 - We can elect as OMI to give the space to one of the companies
