2025-12-16 Weekly Meeting 242 #569

indiebio started this conversation in **Weekly Meetings**

indiebio **2 days ago**   Maintainer

Weekly Meeting 242 is happening on Tuesday, 16 December 2025 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar here.

We'll be meeting in the omi-weekly-meeting channel of the OMI Discord.
We regularly use the # omi-meeting-chat channel for text chat.

Agenda

check in, shootin' the breeze (add agenda points or notes as comments).
Demo's
working group updates: glTF, meta-org (incl Khronos, MSF...), media/curators, Virtual Worlds Museum™ and The Teleportal, composable metaverse, forum/experiments,
add fun finds in the comments

Specific matters to discuss

- "What is OMI about" check-in

What so-called metaverse technologies /topics are we working on here? Off the top of my head:

- interoperable asset spec extensions
- interoperable data infrastructures
- AI assistance (expand)
- Avatar mediated interactions
- community research
- (new) virtual world user design research
- metaverse activity curation
- display server (protocols?) - the stuff that Nova and others are doing
- metaverse browser (I'm not sold that this is a good enough phrase, but basically what RP1 is doing)

...what else?

TODO: explain where the established workplans are, e.g. working groups. So what is structured and what needs more structure. This current list is a bit messy and not clear what is a theme and what is a specific working group. Revisit that weave thing with the horizontal and vertical lines, which thematic areas touch all working groups etc.

indiebio 2 days ago　(Maintainer)　(Author)　edited ▾

What themes do we (want to) explore? Off the top of my head, and heavily biased 😅

- composable ... something. "Any behavior is possible"
- Worldbuilding with infinite Bits not limited Atoms
- virtual world interoperability
- physical world interoperability
- education (new)
- metaculture
- keeping the human in the loop, (human-centric metaverse)
- ...what else?

An inventory of energy around OMI may make sense.
e.g. there is energy around RP1, Aaron and glTF, Keyframe. So how to activate specific members of the community to take on bigger role. Not so much an individual as an group effort, guiding energy towards next steps.

indiebio 2 days ago   Maintainer   Author

Right now if someone wants to do something it stacks more on existing, already full plates. If it is not guided then it can fall over or get abducted by bad actors. Revisit the civic "Executive Summary: Aligning Community Aspiration with Volunteer Labor" thoughts from humbletim

https://indiebio.co.za/building-the-ecology-of-the-metaverse/
We are a collective, using digital technologies to address the challenge of interacting with complex knowledge ecosystems. We use people-centric technology development to empower informed, accountable action from the bottom up. Using digital hyper-connected, integrated technologies – what we understand as the Metaverse – potentially gives grassroots initiatives the ability to contribute to the growing integrated knowledge ecosystem – the Metaverse ecosystem – and thereby scale their efforts and networks globally. We are looking for consortium members to pursue research funding, or strategic partnerships with companies interested in the commercial potential of these approaches. Please find some use cases below with more information. We also welcome anyone to join the journey; find us on Discord – the Open Metaverse Interoperability Group (OMI) (website: omigroup.org/)

What use cases could OMI as a collective get involved in?

- AquaSavvy: Participatory Urban Water Management: https://aquasavvy.eu/ Bringing water sensitive urban design into digital twins of cities,
- Biosphere Metaverse: Contribute research in human-nature interactions facilitated by digitalized knowledge system
- Building a cybernetic library network
- Education as an Emergent game, where Metagaming is core to play
- Including physical world assets into entertainment games – play for play's sake. Options include pervasive, immersive, emergent, etc.

Keyframe share the teleportal updates, and including the hypergrids, e.g. the ones branching out from
OpenSimulator
For reference form the Virtual Worlds Museum, we created a new area on the teleportal for OpenSim
Hypergrids: https://www.virtualworldsmuseum.com/teleportal/

humbletim talk - met puffball and there was conversation about the open viewers, balancing with compatibility
and closed source / open source challenges.

jimmy: progress on newsletter pipeline. One button press to get the extracts. At the moment working with how to get that into
Github Pages.
