Hi!

This is the first of hopefully a monthly-ish email to share what we have been up to in the Open Metaverse Interoperability Group.

The main focus this month is a request for comment on a member's work:
VAV1ST created a three part Metaverse Platform theory for which he requests comment.

general page and slides at the bottom
https://github.com/omigroup/omigroup/wiki/VAV1ST

part 1
https://github.com/omigroup/omigroup/wiki/Part-1---definition-of-the-Metaverse

part 2
https://github.com/omigroup/omigroup/wiki/Part-2---metaverse-platforms

part 3
https://github.com/omigroup/omigroup/wiki/Part-3---the-Metaverse-emergence-scenario

We will be meeting in our weekly "curator" voice meeting on Discord, on Tuesday 2 September 2025, 16:00 UTC where VAV1ST will give a summary overview session.

If people want to delve deeper into the topics, you are welcome to do so through whichever means that works for you. We envisage informally discussing this work over the following meetings for multi hour mini-series. The meetings will be recorded and translated.

This is part of ongoing work to curate our activities and increase collaboration between metaverse groups. Please get in touch if you want to contribute.
