a platform to help creatives to create autonomous AI agents, giving a unified surface.
Eliza is written in javascript, very usable
Similar projects: Semantic kernel
TODO: ask jin to convert to proposal, for vote. No concerns thus far.

Strong agreement: Not replacing the OMI community weekly meetings.
VRChat meetings - Vavist - any day other than Tuesdays "OMI meeting" time

Alternative is Mozilla Hubs, now called Hubs Foundation. Tuesdays, on "OMI time" - same time as community meeting.
Documentation is down, can be accessed via archives, which is useful for e.g. avatar transfer, and may need help to move to a new place?

Strong suggestion to join Hubs on Tuesdays!
