2025-11-25 Weekly Meeting 239 #566

indiebio started this conversation in **Weekly Meetings**

indiebio 2 days ago   Maintainer

Weekly Meeting 239 is happening on Tuesday, 25 November October 2025 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar here.

We'll be meeting in the omi-weekly-meeting channel of the OMI Discord.
We regularly use the # omi-meeting-chat channel for text chat.

Agenda

check in, shootin' the breeze (add agenda points or notes as comments).
Demo's
working group updates: glTF, meta-org (incl Khronos, MSF...), media/curators, Virtual Worlds Museum™ and The Teleportal, composable metaverse, forum/experiments,
add fun finds in the comments

Specific matters to discuss

OSCC Panel hosted by OMI: "Nurturing the health of the Metaverse ecosystem"
conversation points: https://discord.com/channels/887789163045335081/1427702382086586409
Questions:

1. Who wants to be on the panel? My current thinking is that I present the forum thread and the points, as a representative of the community, and then it's an open conversation with everyone who share these passions. So not a panel, per se, just a guided conversation with the audience.
2. What points do you want to add?
3. other stuff?

Call for disruptive tech, indiebio will work on a proposal about "the biosphere metaverse" and try to include as many members of OMI as possible in this international call: https://www.nordforsk.org/news/pre-announcement-upcoming-call-proposals-disruptive-technologies

Conversation will happen in https://discord.com/channels/887789163045335081/1344003597528076340 and likely a new, dedicated forum post and a shared google doc. The broad concept lives here: https://docs.google.com/document/d/1imKUfmvLCDyZJ9QB-eidM7v6TO5Ow5WNu1jS6IUkQaU/edit?usp=sharing

>
> update on Keyframe work: now working on the immersive version:
> https://www.virtualworlds.museum/teleportal - note that the url's that are blocked are because it's built as a test case, in a frame. It will be fixed in due course.
> And create a smaller version for the Quest, to show the interop in their tech too.
>

glTF has been pumping on all fronts!
Skeletons, bones, shapes, mesh, mass, for sitting on seats, ragdolls ...
Also discussed some proposed Khronos extensions for skeleton definitions (and how lacking they are...)
so discussing mostly the draft PR that is public.
Also been collaborating with Basis,
After Basis, and working with seats, then go to BarkVR and work with seats there. Nice work!

MSF: character / avatar townhall - interesting conversations and many different groups presented. Meta
presented too.
Nick Porcino from Pixar presented his reference canonical skeleton framework - researched different
platforms and proposed the start of a standard. Aaron added Godot engine and missing Unity framework
stuff and fixed some VRM problems, so now more complete. If people are interested in this research -
looking at Nick's work is highly recommended!

jimmy: WebXR monthly meeting that happens in Hubs on Sundays. - promote OMI there. so basically jimmy
is the WebXR OMI champion :)

Future of text is the other meta-org thing we need to pursue.

newsletter progress: many rabbitholes.
async agent frameworks - event driven coordination...
