Weekly Meeting 83 is happening on Wednesday November 23, 2022 from 9:00 AM PST(17:00 UTC) - 10:00 AM PST (18:00 UTC)

You can add it to your calendar here.

We'll be meeting again in the omi-weekly-meeting channel of the AngellXR/OMI Discord.
We regularly use the # omi-meeting-chat channel for text chat.

Who we are and why we're here:

The Open Metaverse Interoperability Group (OMI) is focused on bridging virtual worlds by designing and promoting protocols for identity, social graphs, inventory, and more. Our members include businesses and individuals working towards this common goal.

If you're an observer or here for the first time, this is a meeting where people who work on the OMI group initiatives discuss updates and contribution opportunities for current projects and goals. This is your chance to jump in and help!

We welcome you to introduce yourself in #omi-meeting-chat as we dive into the agenda items. There will be an open floor in the last 15 minutes of the meeting (agenda permitting) where we can discuss any items you feel are relevant to the current or near future OMI goals.

Agenda

- Volunteer to take notes? Volunteer to record?
- Welcome newcomers
- Working group updates (abbreviated)
- "Roles on Discord": We need help setting up the roles for `ux-research` and `media` so that discord users can opt-in to that role. I know nothing of our bots, so I could use help (**@mrmetaverse**)
- Tomorrow is a US holiday so let's host a Special Session! Lets explore various virtual worlds, a do my favorite thing: Open Demo Time!

Next week:

- Adding OMI to the Metaverse Street Jin demoed

- Resume demo sessions?

Future demo themes:

- Avatars and Wearables
- Portals pt III
- `OMI-audio-emitter` exploration and demo
- `OMI-collider` exploration and demo
- `Generative and AI tooling`
- Any other suggestions?

Roles on Discord

What is the process of joining a role or making a role joinable on our discord?

- media role, make it subscribable through reaction.
- UX role, created but need to make it subscribable through reaction.

M3 Avatar Group

https://github.com/M3-org/avatar-interop#calendar

- adding issues for the openvoxels dataset
  - converted 3100 to glb.
  - hoping to use gltf transform to encode the metadata into the file.
    - fun case study
    - new interoperable collection from it
    - now has the option to use the XMP extension to add metadata to any glb.
      - This can be useful for wearables relative to aaronfranke's comment in discord
- Explored ViveVerse as well, which now supports VRM

have a suggestion or want to attach a bounty to your idea? submit an issue

Media

- next meeting 2nd week of December
- **@mrmetaverse** and **@LightLodges** to make time for youtube review and playlist formation.
  - We have multiple topics (Avatar interop, portals, etc.)
  - If you have content you want cross-posted, reach out to the media team!

- to add a subscribable role

UX Research

- https://github.com/omigroup/ux-research

- **vote on use cases we should focus on**.

- to create a role

MSF-delegates

- casual sync this morning

- agreed to work on a proposal for MSF to keep things inclusive, trailing on what happened last week with tiered fees.
- looking at ways to be more accessible.

Open Session

Hyperfy and oncyber announced a new interoperable partnership for wearables in their worlds:

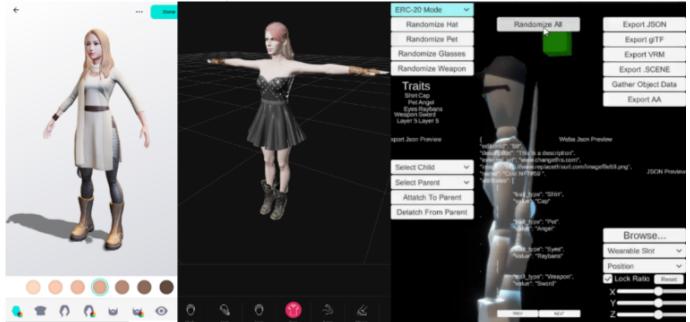

webaverse and oncyber interop was achieved permissionless as well:
https://twitter.com/dankvr/status/1595465003959816197?s=20&t=3c7yLarkEU0ox0qdr7GZoQ

Protocols > Partnerships

Jin shared some screens from the open character creator:

On vs off chain interop

A question was asked about token-gating and the value proposition that serves for interop overall.

We talked about how some platforms choose to token-gate access to their content and experiences. Whereas other platforms deliberately choose to not use any blockchain tooling. It can come down to a matter of preference. There are other platforms that leverage both, and instead focus on the raw interoperability tooling like webxr, VRM, and gTLF which works on or off-chain. (other alterantives to auth)

"It can feel frustrating when I want to experiment and *have* to mess with a wallet to engage," could be more open.

Future Demoing

- Can we reach out to others in the space who want to showcase their work?
- Once we have youtube categories we could highlight them there as well as "content contributors".
- if you have a youtube handle you want linked in our community, drop them in the thread below 👇
