indiebio 2 weeks ago   Maintainer   edited ⌄

Weekly Meeting 156 is happening on Wednesday, 24 April, 2024 from 9:00 AM PDT (17:00 UTC) - 10:00 AM PDT (18:00 UTC)

You can add it to your calendar here.

We'll be meeting in the omi-weekly-meeting channel of the OMI Discord.
We regularly use the # omi-meeting-chat channel for text chat.

Agenda
Check in, welcome
Fun finds!
Working groups check in

Linux Foundation: 2024 World of Open Source: Global Spotlight Survey
https://www.research.net/r/9WL3CJJ?

Are the MSF partners mainly US based/focused? - I'm asking this in the Linux Foundation email thinking - perhaps there is a role for OMI to build out the newly-ish launched Linux Foundation Europe industrial partners.

Update for www.virtualworlds.museum and AWE conference news:
https://www.virtualworlds.museum/blog/virtual-world-museum-april-2024-updates
We're looking to create museum hubs in all of the virtual world platforms, please DM Keyframe if you want to help in this endeavor (Its a heavy lift and we can use the help).

Ongoing conversations

- Lightning talks - to plan next: a hackathon to let people practice through their interview questions, and an end to end kind of sweep to find out the resources on how to do this - by practising with locals first - streamline the resources required.
- Collaborative Library Project
- "if a blogpost was a 3D object, what would it look like?" - hackathon potential!

Last week's notes: #462
Meeting recordings are at https://mee6.xyz/en/dashboard/887789163045335081/record

Future of text potential project - to look at the github repo as a testbed.
(https://thefutureoftext.org/)
https://github.com/omigroup/omi-archive
may be getting potential traction from this blogpost - https://omigroup.org/the-future-of-text-in-webxr/
so could have potential for collaboration

Media working group feedback:
working on the interview function - operationalising the steps needed to amplify voices of members and
affiliated members. Currently jimmy is working on a audio to text tool using AI to make the blog writing easier.
Then next is to do the lightning talk hackathon to once the tool is ready.

jin: MSF avatar / wearables group meetup on mondays. 6 people attending (runs twice for timezones)
Had presentations and stuff going on - felt dynamic. Good collaboration going on between avatars and
wearables group.
Strategic review due in May.
presentation: working on a glossary, and use cases.
jin's working on character studio, wearable voxels.

Collaborative library idea would work well with the museum ideas. Keyframe's thing and others too, e.g.
https://winners.webbyawards.com/2024/ai-metaverse-virtual/general-metaverse-experiences/arts-fashion-
culture/276157/the-iii-museum--an-immersive-art-experience-for-iranian-artists

A common source, like a magazine across metaversey things.
e.g. - shared by humbletim:
If you would like to participate in the balloting of the document listed below, you must enroll as a member
of the ballot group by 23 May 2024, 23:59 UTC-12.

IEEE STANDARD DOCUMENT INFORMATION
The IEEE Computer Society Society/Artificial Intelligence Standards Committee invites you to participate in
the Individual Standards Association Ballot for: P2874
Title: Standard for Spatial Web Protocol, Architecture and Governance
Scope: This standard describes a Hyperspace Transaction Protocol (HSTP) that enables interoperable,
semantically compatible connections between connected hardware (e.g. autonomous drones, sensors,
smart devices, robots) and software (e.g. services, platforms, applications, artificial intelligence systems)
and includes specifications for:

1. a spatial range query format and response language for requesting data about objects within a
   dimensional range (spatial, temperature, pressure, motion) and their content.
2. a semantic data ontology schema for describing objects, relations, and actions in a standardized way

3. a verifiable credentialing and certification method for permissioning create, retrieve, update, and delete (CRUD) access to devices, locations, users, and data; and

4. a human and machine-readable contracting language that enables the expression and automated execution of legal, financial and physical activities.

not so much newsletters / blogs, but dropping morsels that we found in the wild. But then somehow "curated" or open to help people with their self-directed discovery.

"3D figma"
also have AI to do sentiment analysis, help with keywords etc.
jin did this before. It works well internally. but to distribute the message wider, that is harder, how do we do that?
It's like the writer's room within the circle, but we lacked the mechanism to share the output wider.

**indiebio** 2 weeks ago (Maintainer) (Author)

meticulac: When it comes to sharing information morsels, would it make sense to have an in-world RSS reader for representing a collection of recent feed items as objects in the world? - humbletim likes this idea
