2026-02-10 Weekly Meeting 249 #574

indiebio started this conversation in **Weekly Meetings**

indiebio 2 days ago   Maintainer

Weekly Meeting 249 is happening on Tuesday, 10 February 2026 from 9:30 AM PDT (17:30 UTC) - 10:30 AM PDT (18:30 UTC) (see the slight time change)

You can add it to your calendar here and we have Discord events too.

We'll be meeting in the omi-weekly-meeting channel of the OMI Discord. We try to transcribe the meeting as far as possible using SeaVoice.
We regularly use the # omi-meeting-chat channel for text chat.

Agenda

check in, shootin' the breeze (add agenda points or notes as comments).
Demo's
working group updates: glTF, meta-org (incl Khronos, MSF...), media/curators, Virtual Worlds Museum™ and The Teleportal, composable metaverse, forum/experiments,
add fun finds in the comments

Specific matters to discuss

indiebio stepping down as Chair on 30 April 2026.

indiebio stepping down as Chair on 30 April 2026 - giving enough time to transition.
(unrelated, I am travelling and unavailable in the next two weeks).
I will remain an active member with particular focus on my projects and bolstering OMI activity in these, but I do not have capacity to provide any leadership capacity.

What can OMI give YOU?
Why are we at OMI? In the context of us struggling with employment, money, the world ...!!

-> **Brokering opportunities**
Share the stuff that we're working on. Easing that "solitary working" burden. Sharing projects / funding opportunities
-> **Coworking spaces**, covering social isolation of working alone. So both discussion, sharing work, and having voice calls that is just about working together (in silence or occasional talking). This links to ideas about joining & inviting other groups, e.g. BasisVR, BarkVR, joining their voice call co-working spaces. Linking also to the relationship building but with the primary goal of social cohesion/care of individuals.

indie inserted heart and intention into OMI <3 - avatarJoy

indiebio   2 days ago   (Maintainer) (Author)

the original Charter was about having multiples, to have balance and counter personalities. e.g. three co-chairs.
This assumes equal power and neutral dynamics - "Culture eats Strategy for breakfast".

funksoup: served on Fullbright Board - their organisation may be a useful guide
board charter, shared vision

separate to the boardmembers responsibilities document, and the charter document.

> Representing smaller creators and organisations in the larger metaverse ecosystem

This is a role/task that indie is NOT good at. And this is something that is entirely possible to advertise as a role/job that someone can fill.

WebXR prototyping with a focus on agency preservation (the collective concerns about privacy, open source, etc). The basis of this approach is to rely on files for interoperability. What is revolutionary is that it's very boring, yet works. Example video: XR Experiences by Fabien Bénétou (The Future of Text '25) (12 min).

This is a role/task that indie is NOT good at. And this is something that is entirely possible to advertise as a role/job that someone can fill.
funksoup has been filling this role - thank you! What needs are unmet?

Needs:

- Have a cohort board so people can rotate. Not carry all the stuff alone. Knowing that there is a team that can rotate around.
- Having it well documented so that transfer is easy.

Solo attended the MSF 3D meeting.
Lot of discussion around the glTF extension around Gaussian splats, a lot of work to be done, e.g. around compression. Momentum is definitely picking up.

Progress good at focusing on making 4D Gaussian splats more accessible.

compression to be included in the base spec ... classic bikeshedding. ;)
